TECHNOLOGY FOR HIGH PRECISION

BHT CROSS BARS Introductory Promotion

The new **BHT** boring system is characterized by the new **HT** coupling suitable for medium-heavy machining, characterized by strong torsional components with maximum concentricity. **BHT** bars cover a working range from Ø 9.84" to Ø 29.53", both in roughing and finishing. The wide range of accessories includes adjustable ISO-CA roughing cartridges and a standard TRM 63 finishing micrometric head, suitable for boring, chamfering and back-facing operations.
